

Dr. Bortolussi & Dr. Bhalla at Old East Village Dental Specialist invite you to....

# The clinical advantage of the Morse taper connection and its restorative workflow

## Presented by

Dr. Alex Molinari

## Summary

Since the concept of osseointegration was discovered in the 1950's by Prof. Brånemark, many studies have shown high success rates centered around the functionality of dental implants with no regard for esthetics. The longevity of an implant inserted into bone is no longer an issue, but the longevity of the crowns over these implants is now more important, not only from the functional aspect but also from the esthetic point of view. Another important aspect to be observed is the way the soft and hard tissues behave once an implant receives function.

The key aspects that should be evaluated in implant restorations are:

- Evaluation of the interocclusal space
- Individual or multiple restorations
- Screw or cement retained
- Straight or angled abutments
- Evaluation of the soft tissue (quality & quantity) regarding biological width
- Digital vs. Pre-fab solution

These factors must be taken into consideration to rehabilitate a dental implant in order to offer high predictability in the areas of function, esthetic, phonetic and hygienic condition.

## Learning Objectives

- The importance of implant placement thinking 3-dimensionally
- The level of the restoration: Implant vs. Abutment
- Abutment collar height selection regarding biological width
- Optimization of the bone crest and soft tissue maintenance
- Function vs. esthetic and phonetic vs. hygiene – what is more important?

## About Our Speaker...

Dr. Alex Molinari is currently the Director of Clinical Professional Relations and Education for Neodent USA, Inc.

Dr. Molinari received a PhD in Periodontics from the Pontifical Catholic University of Paraná (PUC-PR\_BRAZIL), and a master's degree of implantology by the São Leopoldo Mandic University (Campinas, BRAZIL). Dr. Molinari is a specialist in periodontics at the University of Santa Catarina (UFSC – Florianopolis - BRAZIL) and holds a graduate degree in implant prosthesis from the University of Sagrado Coração (USC – Bauru - BRAZIL). He formerly taught at ILAPEO in Curitiba, BRAZIL and was a Neodent consultant for 15 years. His research has been published in some international journals and also books about Dental implant.

To register, contact  
Dr. Jason Bortolussi's office at  
(519) 432-1153 or e-mail  
[treatment@drbortolussi.com](mailto:treatment@drbortolussi.com)

**Date:** Tuesday, April 16, 2019

**Time:** 5:45 PM – 6:30 PM reception at:

Old East Village Dental Specialists  
849 Dundas Street, London

**7:00 PM** lecture at: Power House Brewery  
100 Kellogg LN, London

*(light dinner will be served)*

**Tuition:** \$39.99

**CE Credits:** 2

Neodent is designated as an approved PACE Program Provider by the Academy of General Dentistry. The formal continuing education programs of this program provider are accepted by AGD for Fellowship/Mastership and membership maintenance credit. Approval does not imply acceptance by a state or provincial board of dentistry or AGD endorsement. The current term of approval extends from 7/1/2016 to 6/30/2020. Provider ID #359866
